Interesting from the South.

From the Richmond Enquirer, July 16. L CALL FOR MARTIAL LAW OVER THE WHOLE

CONFEDERACY.

\* \* \* \* There are much more than one hundred thousand men in the confederacy who have hired substitutes for service. They have paid for them from three hundred to three thousand dollars, and have up to this time avoided the risks of battle and used their time in growing rich. Now do these men estimate the value of their country's freedom, each of them at his three hundred or three thousand dollars i When that sum has been paid, is all that they ever owed to their native land discharged forever? Are they willing to invest just so much to rescue their children from vassalage to the Yankee nation? of first class importers, who, under the influence of the Will they not bid a little higher? If not, we must have the levy en masee, and take Sacrificed Many Desirable Goods them all. Then, let anybody visit the neighborhood of Gen. Winder's office. It is choked with crowds of cowardly wretches, calling themselves foreigners-Germans who are but too glad to get out from under the tutelage of their grand dukes and serene cent, or about 50 per cent on former rates, and we hav-ing been on the spot when it took place, went in ter highnesses-Irishmen who long ago renounced with a malediction their allegiance to Queen Victoria-all crushing one another in the race to show "protections" from those very queens and serene bighnesses, and so fly from the land that sheltered them in its utmost peril. We cannot estimate the number of such men in the whole confederacy, but certainly they would make

a corps d'armee. All these points, which are here only touched upon-the strengthening of our military organization, the application of martial law to the whole country, as in a state of siege-the absolute control of all state of siege—the absolute control of all all his Medicine is wrranted free from tolsonous trading (especially trading in drink), as ingredients, and compounded entirely of Roots and within military lines—the abolition of substitutes, exemption and foreign protections -the material enlargement of the Presisame quality having been sold at wholesate last week in New York at the per yard. None of the above with be seld to neighboring speculators; our legitimate trade alone supplied. dent's power to revise elections of officers. and to make appointments and get rid of incompetent officers-these things form too large and momentous a subject to be disposed in an article. For to day we only desire to excite reflection upon them.

TION. From the Richmond Enquirer, July 16. The office of Gen. Winder exhibited yesterday morning a very strange scene and strange proceedings. A motley crew of foreigners, of every age and sex, crowded themselves around the door, anxious to get passports to go north by way of the blockade. The Jew, whose ample pockets were Mosiery, Gloves & Embroideries stuffed with confederate money; Germans, will be found the largest and most comprehensive in the state. Ladlos will have find a full lightly pressed; Italians, mith at the state of the stat women, with "nine children and one at the breast," (but few Irishmen were there); all beset the office and wanted passports to leave the country.

NO ESCAPE FOR FOREIGNESS FROM CONSCRIP-

But few, however, obtained entrance without great difficulty. Several gentlemen of the legal profession were in attendance, and each one who could pay a suffic ient bonus received the assurance that he the lawyer, would use all his influence to get the required pass. One man, we are told, paid as high as \$500 to a lawyer to vouch him, in order that he might be "fixed

We cannot think that General Winder or his aids understood exactly the matter of the lawyers making use of them for the nurnose of extracting money from those who desire to get passes. There are certain regulations laid down by the department relative to the issue of pasaports, need of the interposition of gentlemen of the legal profession.

There is one thing, however, which should be done. The name of each applicant for a pass to go north, there to remain, should be published at least a week before hand, in order that any person who could certify to the applicant having voted, or in any way exercised the rights of a citizen of the southern confederacy, might come forward and testify to the facts, and those be shipped in the proper manner. It is not fair that those who have drained

the very life blood of our people should be let off thus quietly, and not be made to shed the first at least, if not the last drop of their blood for the government which protected them in the collection of their hoarded pelf.

"Brayk John Burns."-The Germantown (Pa.) Telegraph narrates the follow-

"John Burns, over seventy years of age, a resident of Gettysburg, fought through out the battle of the first day, and was wounded no less than five times -the last shot taking effect in his ankle, wounding him severely. He came up to Colonel Wister. in the thickest of the fight, shook hands with him, and said he came to help. He was dressed in his best, consisting of a light blue swallow-tailed coat, with brass buttons, cordurey pantaloons, and a stove pipe hat, of considerable height, all of ancient pattern, and doubtless an heirloom in his house. He was armed with a regulation musket. He loaded and fired unflinchingly until the last of his five wounds brought him down. He will recover. His little cottage was burned by the rebels. A purse of a hundred dollars has been sent to him from Germantown. Brave John Burns!"

The Boston Pilot, in referring to the course of the British consul in that city in giving exemption or protection to those who have declared their intentions of becoming citizens, says: "The consul is driving a good business in the way of giving protection where none is required. Any Irishman who would seek protection from the representative of a government that has starved and is starving millions of his countrymen, deserves the execration of his race, and should be held up to public scorn, We do not learn how many have been protected by his consulship, but the number is considerable. The fee is \$3 a head."

A recent editorial in the London Times is a fair specimen of the nusterial out of which English knowledge of American affairs is manufactured. The sagacious journal expects to hear in a week's time that from Vicksburg grow more gloomy, and says that there is "scarcely a margin of a chance" that either Port Hudson or Vickeburg will be captured. Before this, it has had ample opportunity for modifying its

A CALL FOR MARTIAL LAW OVER THE WHOLE CONFEDERACY. There are much more than one hundred thousand men in the confed eracy who have hired substitutes for ser-They have paid for them from three hundred to three thousand dollars, and have up to this time avoided the risks of battle and used their time in growing rich. Now do these men estimate the value of their

country's freedom, each of them at his three hundred or three thousand dollars When that sum has been paid, is all that they ever owed to their native land discharged forever? Are they willing to invest just so much to rescue, their children from vassalage to the Yankee nation? Will they not bid a little higher? If not, of first class importers, who, under the influence of the we must have the levy en masse, and take them all. Then, let anybody visit the neighborhood of Gen. Winder's office. It is choked with crowds of cowardly wretches, calling themselves, foreigners-Germans who are but too glad to get out from under, the tutelage of their grand dukes and sevene highnesses—Irishmen who long ago renounced with a malediction their allegiance o Queen Victoria-all crushing one another in the race to show "protections" from those very queens and serene highnesses, and so fly from the land that sheltered them in its atmost peril. We cannot esti mate the number of such men in the whole confederacy, but certainly they would make

> All these points, which are here only touched upon—the atrengthening of our military organization, the application of martial law to the whole country, as in a state of siege—the absolute control of all trading (especially trading in drink), as within military lines the abolition of substitutes, exemption and foreign protections the material collargement of the President's power to revise elections of officers, and to make appointments and get rid of incompetent officers-these things form too large and momentous a subject to be dis posed in an article. For to-day we only desire to excite reflection upon them. NO ESCAPE FOR FOREIGNERS FROM CONSCRIP-

> TION. From the Bickmond Enquirer, July 16. The office of Gen. Winder exhibited yesterday morning a very strange scene, and strange proceedings. A motley crew of. foreigners, of every age and sex, crowded themselves around the door, anxious to get passports to go north by way of the block ade. The Jew, whose ample pockets were stuffed with confederate money; Germans, with hands on pockets tightly pressed; Ital ians, with the silvery jergon; and the Irish women, with "nine children and one at the breast," (but few Irishmen were there); all beset the office and wanted passports to leave the country.

But few, however, obtained entrance without great difficulty. Several gentlemen of the legal profession were in attendauce, and each one who could pay a suffic-ient bonns received the assurance that he, the lawyer, would use all his influence to get the required pass. One man, we are told, paid as high as \$500 to a lawyer to vouch him, in order that he might be "fixed

up."

We cannot think that General Winder or his aids understood exactly the matter of New Broom Black Silks, (to be had only of us,) also the lawyors making use, of them, for the New Broom Black cather.

Regulah Crown, Sumblished and Blechoff do do.

We close out from one of the heaviset importors in We close out from one of the heaviset importors in who desire to get passes. There are certain regulations laid down by the departation regulations and down by the departation of passengts. ment relative to the issue of passports, and, those being complied with, there is no need of the interposition of gentlemen of

the legal profession. There is one thing, however, which should be done. The name of each applicant for a pass to go north, there to re-main, should be published at least a week before hand, in order that any person who could certify to the applicant having voted, or in any way exercised the rights of a cit izen of the southern confederacy, might come forward and testify to the facts, and

hose be shipped in the proper manner. It is not fair that those who have drained the very life blood of our people should be et off thus quietly, and not be made to shed the first at least, if not the last drop of their blood for the government which protected them in the collection of their hoarded pelf.

"BRAVE JOHN BURNS."-The Germantown (Pa.) Telegraph narrates the follow-

ing:
"John Burns, over seventy years of age, a resident of Gettysburg, fought through out the battle of the first day, and was wounded no less than five times -the last shot taking effect in his ankle, wounding him severely. He came up to Colonel Wister, in the thickest of the light, shook hands with him, and said he carre to help. was dressed in his best, consisting of a light blue swallow tailed coat, with brass buttons corduroy pantaloons, and a stove pipe hat, of considerable height, all of ancient pattern, and doubtless an heirloom in his house. He was armed with a regulation musket. He loaded and fired undinchingly until the last of his five wounds brough him down. He will recover. Ris little cottage was burned by the rebels. A purse of a hundred dollars has been sent to him from Germantown. Brave John Burns!"

The Boston Pilot, in referring to the course of the British consult in that city in giving exemption or protection to those who have declared their intentions of becoming citizens; says :: "The consul is driving a good business in the way of giving protection where none is required: Trishman who would seek protection from the representative of a government, that has:atarved and is starving millions of his countrymen, deserves the execration of his race, and should be held up to public scorn. We do not learn how many have been pro-tected by his consulabile, but the number is considerable. The fee is \$3 a head."

A recent editorial in the London Times is a fair specimen of the reaterial out of which English knowledge of American affairs is manufactured. The sagacious journal expects to hear in a week's time that 'President "Davis is established at Washngton; thinks that Grant's dispatches from Vicksburg grow more gloomy, and says that there is "scarcely a margin of a chance" that either Port Hudson or Vicksburg will be captured. Before this, it has had ample opportunity for modifying its ideas.

The New York Copperhead Rebellion.

The belief is gaining ground that the New York riot had another purpose than to prevent the draft. It is believed that it was designed by its leaders to aid Lee's invasion. On the contrary, we believe, when the secret history of the war shall have been published, the conduct of the General will be amply justified by circumstances of which we are now, and must for a generation remain, completely ignorant."

Were these "circumstances," which cannot be divulged "for a generation," the copperhead riots? There is a mystery about this paragraph which challenges more than a passing consideration. The Richmond Whig declares that the

resistance to the draft has successful, and that it has been withdrawn in New York. "The great riot," it says, " possesses a political and military significance of the highest and most absorbing character."

The Whig says that if Lee had won the battle of Gettysburg, the copperhead rebellion would have been decisive in favor of

This affair is a revolution. We here get a glimpse of what is slumbering under the shoddy. What would have happened had Lee won the last battle of Gettysburg? No one can doubt that the war would have ended in a month.

The Richmond Dispatch is quite sure there will be no recruits sent to our armies -the copperheads will prevent it. All the Richmond journals count largely upon the copperheads of the west to resist the draft, and to inaugurate a civil war in our midst. The Dispatch thus gloats over the effects fact that the loss of life above stated is

of the insurrection: We may very safely conclude that the days as well as the soldiers of the Union army are numbered. Let us have more of these outpourings-a few more great cities on the mourner's bench-some more gutting and sacking of houses, and hanging and mutilating of men. It saves the confederate troops a deal of marching and fighting, and lops off many a dreary month

of this war. The news is cheering to us, indeed, because it portends the breaking down of the whole structure of Yankee society.

The rebels appear to be counting largely ceedings, is that President Lincoln had put had got himself professionally bloody, "had on these riets, and it appears that it was a a flea in his ear. Day by day the masses of the people are gradually drawn into the meshes of that, with this, there fell into our hands secession, and at the rate the copperheads over 5,500 prisoners, including one major are going on, if they do not change their course, it will not be six months until revolution and civil war will break out in the good supply of projectiles for line and new peaceful communities of the north. His club wheat, growing side by side, he estimates at 20 bashels to the acre. The star wheat has generally four prongs or heads to each stalk. The wheat is superior for milling. William Whiting, Solicitor of the War Repartment, is published for the insermation of all concerned: "When a person has been drafted, in pursuance of

the Entelment act of March 3, 1863, notice of such draft must be served within ten days thereafter, by a arliten or printed notice, to be served on him personully, or by leaving a copy at his last place of residence, Brickuel Pomercy, the unhappy exile from requiring him to appear at a designated rendezvous to report for duty. Any person falling to report for duty after notice Last at his last place of Residence, or served on him personally, without furnishing a substitute or paying \$300, is pronounced by law to be a deserter; he may be arrested and held for trial by courtmartial, and exprenced to drath. "If a person after being drafted, and before receiv-

ing notice, deserts, the notice may still be served by leaving it at his last place of residence, and if he does not appear in accordance with the notice, or furnish the substitute or pay the \$300, he will be in law a descrior and must be treated accordingly. There is no way or manner in which a person once 'envolted,' can escape as if he wanted to "lick" his antagonist, his public duties, and when drafted, whether present or absent, whether he changes his residence or absconds, the rights of the United States against him are threatened to send Hatch to jail if he secured, and it is only by performance of his duty to the country, that he will escape liability to be treated WILLIAM WHITING,

The New York Copperhead Rebellton.

The belief is gaining ground that the New York riot had another purpose than to prevent the draft. It is believed that it was designed by its leaders to aid Lee's in vasion. It was timed just right, especially direct for New York, where his "friends" were at work. The riot took place in the absence of the military, which had all been Geneseo, New York, on the 15th just., in sent, by Gov. Seymour, with an alacrity which he used this emphatic language: quite surprising at the time, to the aid of "This rebellion has its existence to day in Pennsylvania. The Richmond papers are the hope of having help here; and its the most profitable branches of business full chorus.

Substitutes

Substitutes discussing the riot and their remarks are sympathisers at the north are more guilty worth considering. The Dispatch, which for its continuance than Jeff Davis is." is the organ of Jeff. Davis, speaking of the invasion of Lee says:

Pennsylvania was a rash and dangerous experiment, which there was no justifica-tion for having undertaken. We are not one of these. On the contrary, we believe, when the secret history of the war shall have been published, the conduct of the General will be amply justified by circumstances of which we are now, and must for a generation remain, completely ignorant."

Were these "circumstances," which cannot be divulged "for a generation," the copperhead riots? There is a mystery about this paragraph which challenges more than a passing consideration.

The Richmond Whig declares that the resistance to the draft has successful, and that it has been withdrawn in New York. "The great riot," it says, " possesses a political and military significance of the highest and most absorbing character." The Whig says that if Lee had won the

battle of Gettysburg, the copperhead rebellion would have been decisive in favor of

This affair is a revolution. We here get a glimpse of what is slumbering under the What would have happened had Lee won the last battle of Gettysburg? No one can doubt that the war would have ended in a month.

The Richmond Dispatch is quite sure there will be no recruits sent to our armies -the copperheads will prevent it. All the Richmond journals count largely upon the copperheads of the west to resist the draft, and to inaugurate a civil war in our midst. The Dispatch thus gloats over the effects of the insurrection:

We may very safely conclude that the days as well as the soldiers of the Union army are numbered. Let us have more of these outpourings-a few more great cities on the mourner's beach-some more gutting and sacking of houses, and hanging and mutilating of men. It saves the confederate troops a deal of marching and fighting, and lops off many a dreary month

The news is cheering to us, indeed, because it portends the breaking down of the whole structure of Yankee society.

The rebels appear to be counting largely on these riots, and it appears that it was a part of Lee's plan to invade the north just | Washington by the U. S. Day by day the masses of the people are gradually drawn into the meshes of secession, and at the rate the copperheads are going on, if they do not change their olution and civil war will break out in the new peaceful communities of the north. OCCUPATION OF REBEL TOWNS. - Two companies of soldiers entered Shullsburg lest Thursday, the 16th, and took quiet possession of the place, without firing a gun! Portions of the force were immediately sent to Benton and New Diggings, and succeeded, also, in making quiet occupation of those formidable localities. Gentlemen who passed through Benton on Sunday, report some sixty soldiers there at that time, and that the men folks, with the exception of about half a dozen, who claimed to be citizens of Galena, had left the place, which looked for all the world like a deserted secosh village, occupied by federal forces.— These towns, thus so easily captured, are the very ones which a few weeks ago defied the whole state of Wisconsin to come and "take" them. Yet a bare 200 of "Abe Lincoln's hirelings" have not only done the battle of Gettysburg, and were aban-doned by their comrades.

THE REBEL ARMY .- Lee's force is estimated as follows: Stuart's cavalry, I 1,000; Longstreet and Ewell's corps, 18,000 each Hill's corps. 15.000. These, with 18.000 more rebels at Richmond and Petersburg, are reported to include the whole rebe force. The confederacy never had so few troops as at present. Since their recent osses at Port Hudson and Vicksburg, all the troops they can muster are estimated as follows: 30,000 at Charleston, under Beauregard; 10,000 at Mobile; 15,000 under Marmaduke and Price; 20,000 under Johnston:: 50.000 under Bragg: 25.000 at various detached points-in all only 240;-000. The dispatch as to the course of Louis Napoleon declaring Mexico an empire, and placing Maximillian on the Imperial throne, in the halls of the Montezumas meets with ihe just indignation of Union men of Philadelobia. A public meeting is talked that no special enort has been made to select large sheep, but that the fleeces are about to give expression of popular feeling taken from a whole fleek as they run it on the subject. It has staggered the rebel sympathizers in Philadelphia.

New York, July 27. Mayor Opdyke to-day vetoed the ordinance, passed last week, to pay conscripts \$300, on the ground of vagueness and illegality. Other objections are also urged. It appears that the council of notabilities declared that the Mexican nation, through them, select an empire as the form of government, and pro-claim Maximilian, of Austria, emperor. Should be decline the throne, they implore the French emperor to select a person in whom he has fall confidence to accept the throne. This declaration was immediately made public, and a courier posted to Vers Cruz, whence it was sent by a French steamer to Havana.

From the San Francisco Evening Bulletin, On the 1st of June a meeting of the principal leaders of the "traitors," or church nerty, was held in the City of Mexico, at the Plaza de Armes. After some consultation, they appointed General Sales in command of the district. On the 3d of June, they sent a commissioner to General Forey, stating that the city was at his disposal, and that they would be proud to become the subjects of his Majesty the Emperor Napoleon.

We give a translation from a private letter received from Don Diego Alvarez, governor of the state of Guerrero, of which Acapulco is the seaport, to the editor of La Vaz de Mejico, a Mexican journal published in San Francisco. This letter is dated on the evening of the 18th of June. It

with the capital has been interrupted since the 31st of May, at which date the supreme constitutional government had been re-moved to San Luis Potosi.

By an article which you will see in the Cronists, copied from La Monarquia, you will comprehend how far the shortsightedness of this band of traitors extends,-Here is an extract: 'This (the occupation of the City of Mexico by the French) set | southwest. tles with absolute certainty at this time that it is necessary to extirpate by the root the democratic element, and not continue dreaming of popular sovereignty, but to banish forever such vain and useless theories.' The tone in which these traitor in terventionists' speak already (as you will see by the proceedings which followed after the before mentioned article), among whom figures very conspicuously the celebrated Padre Miranda, the rest being principally military reactionists and priests, demonstrates perfectly well that they are unanimonsly in opinion with Forey, and undoubtedly have received instructions from his

camp.
"I believe that it is indispensible that these newspaper articles should be published to the world, in order that they may be the voice of alarm for the American continent. In view of their publication, the doubts and vacillations of the government at Washington will no longer continue; but the United States will hasten to co-operate in favor of a sister republic, for it is not alone Mexico which will be destroyed, but the very souce of the democratic element. Undoubtedly, nobody will deny but that source exists in the United States, and it is there that they wish to reach, as it was so accurately said on a late occasion by the senator from California, Mr. Mc. "The views of Napoleon in the occupa tion of Mexico are, that it will enable him to place his foot on China, and extract from there its accumulated treasures. These are only the means to reach to another end, and that end is the establishment of universal monarchy, extirpating all American republics, in order to enable him to cement his dynasty. He may mistake in the means for the consummation of this colossal project, which I think impossible in the present age we live in: but he who sees not his thought in all its forms, which to this day has been marked out during his reign, is assuredly blind. I arge you still to continue to stimulate

the Mexican patriots in California to help in every way they can the mother country, and for them to hasten home to take a part in the horrible contest that is about to be opened; and as the present war does not only concern Mexicans, but all American ropublics who wish to preserve their nationalities, you will do well to invite Americans to take a part in our affairs, as the present war effects the independence of the United States. again to day. The wet weather interferes with the harvest, and adds much to the labors of the farmers. The weather is, however, cool, and its effect is as yet rather favorable than otherwise. The wheat has been benefitted by the rains of the last few days, causing it to fill better and ripen in miking purchases. quicker, out the way of the chinch bug. These insects appear to like dry weather and dry land, and nothing stupifies them like a cool and soaking shower. It has been suggested that a good seeding down with clover, with every crop of wheat, would so cover the ground as to keep it moiet, and prevent the work of the bug, at the same time enrich the land,

A "Field Officer" writes to the London Star, that in the Crimean war the second West India regiment, (black) volunteered to fight against Russia. The British government is raising a black corps as a substitute for the white St. Helena regiment. The efficers speak favorably of the colored troops he has seen in Barbadoes, Grenada, and Trinidad.

A NEAT ADVERTISING MEDICA.-Mr. J. Lusk has put up at the American and the Hyatt houses an advertising frame which is peculiarly neat and handsome, around a mirror in the centre cards of different business establishments are arranged, executed with the pen in a skillful and ornamental style. We have made the above Reduction in Prices with the two-fold view of benefiting the public and ourselves. The public have been swindled by spurious machines made in limitation of ours. The metal in them, from the iron casting to the smallest piece, is of poor quality. They makers have not the means to detheir work well. They are hid away in socret places, where it would be impossible to have at their command the proper moon of health and having extensive manufacturing establishments, that good machines can be made at moderate prices. The best designed machines, Bady Alace, are playsy hable to got out of order, and are sure to cost considerable trouble and money to keep them in repair. The qualities to be looked for in a machine see: certainty of correct action at all rates of precisimplicity of construction great durability and requirity of operation, with the least labor. Machines to combine those essential qualities, must be made of the bet mediated in finished to perfection. We have the ways and means, on a grand scale, to do this.

The purchasers of machines, whose daily broad it may, concorn, will find that those having the above qualities not only work well at rapid as well as slow rates of speed, but least long in the finest possible working order: Our machines, as made by us, will carn wore money with less labor than any others, whether in limitation of earsor not. In fact, they are cheaper than any other machines as gift. persons as they may appoint. ....
